Exam Monitoring for UK PPPG 2025	Nov 2025
Member of LDUA Syiar	Feb 2024 - Dec 2025
U-Fest 2024 Organizing Committee Chair	Nov 2024
PKKMB Prodi PDP staff	Aug 2024 - Sep 2024
PKKMB Fakultas PDP staff	Aug 2025 - Sep 2025
SISKOM 33 Event Division staff	Sep 2024
SALIM FMIPA member	Jan 2024 - Apr 2024
Member of KIR SMAN 103 Jakarta	Feb 2021 - Mar 2022

Projects

SIAKAD 3.0 — Jakarta, Indonesia

Nov 2024 - Present

Front-End Developer

- Develop a responsive and intuitive user interface tailored for the lecturer dashboard to streamline daily academic management.
- Implement core features specific to the lecturer role, including grade submission, student attendance tracking, and academic schedule viewing.
- Integrate front-end components seamlessly with backend APIs to ensure real-time data synchronization of university records.
- Optimize UI components for faster load times and utilize GitHub for version control and efficient team collaboration.

Full-stack Developer

- Engineered a secure authentication system and implemented role-based access control (RBAC) to manage permissions for Admins, Interviewers, and Principals.
- Developed robust RESTful APIs to handle comprehensive CRUD operations for participant management, document processing, and dynamic assessment rubrics.
- Built specialized backend modules to process and store multi-faceted evaluation data, including Interviews, Microteaching, English Proficiency, and Psychological tests.
- Optimized data retrieval endpoints to power real-time monitoring and analytics dashboards across multiple user roles.

Full-stack Developer

- Designed an intuitive mobile user interface with interactive dashboards to clearly visualize financial data, cash flow, and transaction history.
- Implemented reliable data storage and state management to securely process, categorize, and maintain financial records directly on the user's device.

Full-stack Developer

- Engineered core risk modules including Risk Identification, Mitigation tracking, and Qualitative Impact analysis, supported by secure role-based access control.
- Implemented dynamic reporting features with PDF and Excel data export capabilities, alongside automated email notifications for mitigation workflow updates.
- Built a responsive, modern user interface using React and TypeScript, featuring interactive dashboards, modular components, and comprehensive settings management.

Front-End Developer

- Designed an intuitive user interface employing Tailwind CSS, ensuring seamless adaptability and styling consistency across various devices.
- Built reusable and interactive UI components, including dynamic flip cards and modal dialogs, to significantly enhance user engagement.
- Structured the application architecture with clear navigation routing and dedicated pages for content browsing and user ratings.

Achievemets

1st MLBB Dekan Cup FMIPA 2025	Mar 2025
1st MLBB Dekan Cup FMIPA 2024	Mar 2024
Best Participant SISKOM 32	Sep 2023

Skills

HTML, CSS, Javascript, React.js, Vue.js, Git, Laravel, Phython, C++, Kotlin, Flutter, Node.js, Tailwind, Typescript, PHP, MySql

Employment History

- Responsible for developing and maintaining all websites created for the university..
- Design and implement efficient databases and back-end applications to support the university's internal information and communication needs.
- Optimize web applications for improved performance and security.
- Work within a development team to plan, evaluate, and implement new features according to user needs.
- Performs troubleshooting and debugging on web applications to ensure a smooth and responsive user experience.
- Maintain current technical documentation to facilitate future system maintenance and upgrades.
